INTERNATIONAL WORKSHOP ON MACHINE INTELLIGENCE: RELIABILITY ANALYSIS AND APPLICATIONS

January 13, 2023

The recent wave of research focusing on machine intelligence (machine learning and artificial intelligence) and its applications has been fuelled by both hardware improvements and deep learning frameworks. Advances in AI also accelerate research towards self-supervised learning where dynamic control mechanisms are designed to tackle complex tasks.

The present workshop will provide a platform for discussing emerging trends in Software Reliability analysis of machine learning based systems and applications of Machine Intelligence systems in health care.

Please note that as we have a capacity of 30 seats, so a shortlist of 30 candidates will be made from the registered candidates and will be published on our website on January 10, 2022.

As we have a limited seat capacity in our workshop, so it is being advised that please be sure to attend the workshop if you are shortlisted.

Keynote Speakers

LANCE FIONDELLA
UMD, United States

SANDIP CHAKRABORTY
IIT, Kharagpur, India

ASHISH RANJAN HOTA
IIT, Kharagpur, India

Registration is free. Register Now

Registration Deadline: January 08, 2023
